About Ignis

Providing a modern & proactive approach to Passive Fire Protection

Ignis Fire Prevention Ltd is a single point passive fire protection specialist working with clients and building control to achieve fire safety solutions.

Our team has decades of experience in all sectors of the UK construction industry including new build, refurbishment and maintenance.

We work nationally with numerous 'blue chip' clients.

A single point passive fire protection specialist working with clients and building control to achieve fire safety solutions.

All of our work is IFC accredited and certified. We are a CHAS Premium Plus member and are Constructionline Gold Accredited.

About Ignis

Providing a modern & proactive approach to Passive Fire Protection

All our Fire Protection Works are Fully Traceable with 3rd Party Accreditation by IFC

IFC Certification Ltd is a UKAS accredited, and internationally recognized provider of high-quality 3rd party certification where certified installers are subject to independent auditing.

This enables us to issue a certificate of conformity to the client for works carried out on each project supported by the certification body. (IFC)

The Very Best in Passive Fire Stopping within the Construction Industry

Ignis Fire Prevention Ltd offers the very best in Passive Fire Stopping within the construction industry, all services installed to the highest level of quality and care.

With years of experience of working in the UK construction industry, our team of professionals are able to provide the best in fire stopping installations, we adopt a proactive approach.

Our Services

Providing a modern & proactive approach to Passive Fire Protection

Intumescent Spraying

Hand or spray applied intumescent coatings from leading manufacturers to maintain the integrity of structural steels.

Fire Stopping of Service Penetrations

Sealing of service penetrations through fire rated compartment walls & floors. Closing devices to prevent the spread of smoke and fire. Air Sealing. Intumescent Sealants. Perimeter slab voids. Cable coatings.

Cavity Barriers

Systems to prevent the spread of fire and smoke within roof voids, suspended ceilings and concealed spaces. Creating compartments to safeguard high risk areas or escape routes.

Our Services

Providing a modern & proactive approach to Passive Fire Protection

Fire & Smoke Stop Blocks

These Blocks can be pre-cut to fit the profile of most common types of deck, such as Comflor E60 (pictured) etc.

Fire Curtains & Barriers

Easy to install solutions which can be used to achieve compartmentation in many situations such as, ceilings and roof voids to inhibit the spread of heat.

Fire Doors

Providing assessment of existing fire doors, specification of replacement fire doors. As well as maintenance works to internal and external fire doors.
